[GRADUATING STUDENT SURVEY RESULTS]

Executive Summary

Survey Respondents and Response Rate: 196 graduating students took the survey

In June 2021, students graduating with either an associate degree or certificate were surveyed using an online survey distributed through Qualtrics. Emails were sent out to 855 graduating students asking them to complete the graduating student survey. There were 196 usable responses for a response rate of 23%. Of these respondents, 165 (84%) are receiving an associate degree and 31 (16%) are receiving a certificate. There were 942 students receiving degrees in FY2021.

Employment Plans: 45% of new graduates are seeking new employment and 13% have already secured new positions

Graduates were asked about their current employment status, which includes military service. If graduates responded that they were either continuing employment or beginning new employment, they were asked about the relationship of their work to their STCC education as well as whether their work is or will be full- or part-time. Of graduates responding to this question, about 67% report being currently employed. About 13% of students have secured new positions as they graduate, whether they were already employed or not. About 45% of graduates are seeking new positions, whether they are currently employed or not. Many graduates are pursuing further education instead of or in addition to employment.

Continuing Education Plans: 62% of new graduates expect to continue their education

Graduates were asked whether they will be continuing their education within the next year and whether they will do so in a full- or part-time capacity. About 64% of graduates receiving associates degrees plan to continue their education within the year, with most planning to attend a 4-year college or university. About 47% of certificate graduates plan to continue their education, with the majority returning to STCC.

Perceived Educational Preparation: 92% of graduating students feel that STCC prepared them for continuing education

We asked graduates several questions about their educational experience at STCC including their overall preparedness, how their education at STCC had improved their academic and personal skills, and the barriers and supports they experienced in their efforts to complete their credentials. In response to a question about how well their STCC education had prepared them for further education, only eight students reported being either somewhat or very unprepared. Over 62% of all award recipients said they were very well prepared.

Perceived Educational Barriers: Family responsibilities, financial difficulties, and length of time since last in school as most frequent barriers to student success

We also asked graduates about the barriers they faced as they worked to obtain their credentials. Approximately 50% of associate degree students experienced either minor or major barriers to their education because of family responsibilities and financial difficulties. For certificate recipients, over 50% experienced either minor or major educational barriers due to not being in school for a long time.

Perceived Educational Supports: Faculty and learning activities pave the way for success

Finally, we asked students about the factors that helped them succeed in completing their credentials. For students receiving their associate degree, more than 90% cited faculty and/or instructors (in-class time) and in-class experience and activities as being a part of their completion success. For students receiving certificates, more than 90% cited faculty and/or instructors (in-class time) as being part of their completion success.

STCC Graduating Student Survey Results: 2021

Since 2013 the Office of Assessment has conducted a graduating student survey at Cap & Gown Pick-Up. This year, due to COVID-19, the survey was conducted using an online survey tool. All survey questions can be found in Appendix I. (Please note that not all totals equal 100% due to rounding.)

Survey Respondents and Response Rate: 196 graduating students took the survey

In June 2021, students graduating with either an associate degree or certificate were surveyed using an online survey distributed through Qualtrics. Of these respondents, 165 (84%) are receiving an associate degree and 31 (16%) are receiving a certificate. There were 942 students receiving degrees in FY2021.

Of the respondents who answered the questions on race/ethnicity, 28% identified as Hispanic, 49% as white, and 15% as black; 8% identified as other races or as multi-racial. There were 40% of respondents who identified as male and 59% who identified as female. We also asked students how old they were when they started their STCC education: 33% were 19 years old or younger; 22% were 20-24; 10% were 25-29, and 35% reported being 30 or older when they began their program.

Graduates were asked how long it took them to complete their credentials and from which program they were receiving it. The majority of students graduating with an associate degree graduated in 3 years or less. The majority of students graduating with a certificate graduated in 2 years or less. The list of programs represented by credential type can be found in Appendix II of this report.

Of graduates responding to this question, about 67% report being currently employed. About 13% of students have secured new positions as they graduate, whether they were already employed or not. About 45% of graduates are seeking new positions, whether they are currently employed or not. Many graduates are pursuing further education instead of or in addition to employment.

White and Hispanic students were more likely to be currently employed and not seeking a new position (white: 41%, Hispanic: 40%, black: 28%). Black students were more likely not to be currently employed, but seeking employment (black: 36%, white: 23%, Hispanic: 19%). Graduating students who identified as white were likely to be currently employed and seeking a new position (white: 22%, black: 20%, Hispanic: 15%). Students who identified as Hispanic were more likely to be currently employed but had secured a new position (Hispanic: 12%, white: 8%, black: 8%) than students who identified as black or white.

Not employed, SECURED position	3%	6%
Not employed, NOT seeking position	7%	3%
Entering or continuing military service	0%	0%

Graduating students who reported being currently employed or having secured a new position were asked about their full-time versus part-time status. Twenty-five students had secured new positions as of this survey.

Work Hours	Associates		Certificates	
	Current Position (n = 112)	New Position (n = 21)	Current Position (n = 18)	New Position (n = 4)

Continuing Education Plans: 62% of new graduates expect to continue their education

Graduates were asked whether they will be continuing their education within the next year and whether they will do so in a full- or part-time capacity. About 64% of graduates receiving associates degrees plan to continue their education within the year, with most planning to attend a 4-year college or university. About 47% of certificate graduates plan to continue their education, with the majority returning to STCC.

At a different 2 year college	4%	0%
At another non-degree educational program	2%	3%
I'm not beginning any additional education this year.	36%	53%

More students identifying as black plan to attend a 4-year college or university (black: 50%, Hispanic: 35%, white: 35%). White students were more likely to respond that they did not have immediate continuing education plans (white: 46%, Hispanic: 38%, black: 38%). Hispanic students were most likely to have plans to continue in another program at STCC (Hispanic: 25%, white: 13%, black: 8%).

Of those students pursuing additional education, about 71% plan to attend full time. Students identifying as black plan to attend full-time at a higher rate than those who identify as Hispanic or white (black: 73%, white: 71%, Hispanic: 67%).

Perceived Educational Preparation: 92% of graduating students feel that STCC prepared them for continuing education

We asked graduates several questions about their educational experience at STCC including their overall preparedness, how their education at STCC had improved their academic and personal skills, and the barriers and supports they experienced in their efforts to complete their credentials.

In response to a question about how well their STCC education had prepared them for further education, only eight students reported being either somewhat or very unprepared. Over 62% of all award recipients said

they were very well prepared. Hispanic and white students reported higher levels of being very well prepared to continue their education than black students (Hispanic: 70%, white: 67%, black: 60%).

STCC education played no role in preparation for continuing education	1%	0%

To learn more specifically about the preparation of the graduates, we provided a list of educational and personal skills and asked students to rate how much their STCC experience had improved these abilities. Mean improvement responses were somewhat lower for certificate than associate degree holders, as might be expected given that they have spent less time at STCC to complete their credentials. All mean scores were between 3 (some improvement) and 4 (a lot of improvement). Of all the skills, graduates reported the largest gains in their abilities to think critically, research a problem and assess information to address it, get along with many different kinds of people, make and justify decisions, and consider a subject from multiple points of view. Black and Hispanic students reported the greatest gains in each of these skills.

Approximately 50% of associate degree students experienced either minor or major barriers to their education because of family responsibilities and financial difficulties. For certificate recipients, over 50% experienced either minor or major educational barriers due to not being in school for a long time.

Students identifying as black reported family responsibilities (black: 43%, white: 28%, Hispanic: 27%), not being in school for a long time (black: 28%, white: 19%, Hispanic: 15%), unclear academic or career goals

(black: 25%, Hispanic: 15%, white: 12%), job demands (black: 23%, white: 15%, Hispanic: 6%), financial difficulties (black: 22%, Hispanic: 17%, white: 16%), and personal and/or health challenges (black: 18%, Hispanic: 17%, white: 14%) as significant barriers more often than students identifying as white or Hispanic. Students identifying as Hispanic also reported it taking a while to find the program they wanted to complete (Hispanic: 15%, white: 9%, black: 8%), housing issues (Hispanic: 13%, black: 9%, white 2%), and their course load being too heavy (Hispanic: 13%, white: 7%, black: 5%) as significant barriers more often than students identifying as white or black.

Perceived Educational Supports: Faculty and learning activities pave the way for success

Finally, we asked students about the factors that helped them succeed in completing their credentials. For students receiving their associate degree, more than 90% cited faculty and/or instructors (in-class time) and in-class experience and activities as being a part of their completion success. For students receiving certificates, more than 90% cited faculty and/or instructors (in-class time) as being part of their completion success.

Students identifying as black identified family inspiration, support, or encouragement (black: 75%, white: 73%, Hispanic: 63%), academic advisors (black: 70%, Hispanic: 58%, white: 46%), being a role model for others (black: 68%, Hispanic: 58%, white: 44%), classmate inspiration, support, or encouragement (black: 61%, Hispanic: 52%, white: 47%), other, non-family inspiration, support, or encouragement (black: 61%, Hispanic:

50%, white: 41%) faculty and/or instructors (out-of-class time) (black:58%, Hispanic: 50%, white: 48%), college staff (not faculty or advisors) (black: 58%, Hispanic: 31%, white: 28%), out-of-class homework and projects (black: 54%, Hispanic: 50%, white: 41%), and campus activity group or club (black: 35%, Hispanic: 19%, white: 14%) as major success factors more frequently than students identifying as Hispanic or white. Students identifying as Hispanic identified faculty and/or instructors (in-class time) (Hispanic: 85%, white: 78%, black: 75%) and in-class experience and activities (Hispanic: 79%, white: 65%, black: 64%) as more important for their success than students identifying as black or white.

Graduate Survey Trends: Writing and math continue to be least improved for our students, non-academic barriers most common, faculty still leading student success factor

The College now has seven years of graduating student survey data. The graduating student survey was first administered in 2013 and has been done annually at cap and gown pickup. The paragraphs below summarize some of the noteworthy trends for 2021.

Since the College started collecting data on graduating students, the ability to write clearly and the ability to use math to address day-to-day issues or problems have consistently been reported as the least improved by graduating students. In 2021, using math day-to-day was the least improved with a mean of 3.12 and writing clearly was second least improved with a mean of 3.14. In comparison, the abilities that showed the most improvement in 2021 were thinking critically (3.63), researching a problem and assessing information to address it (3.54), and getting along with many different kinds of people (3.49).

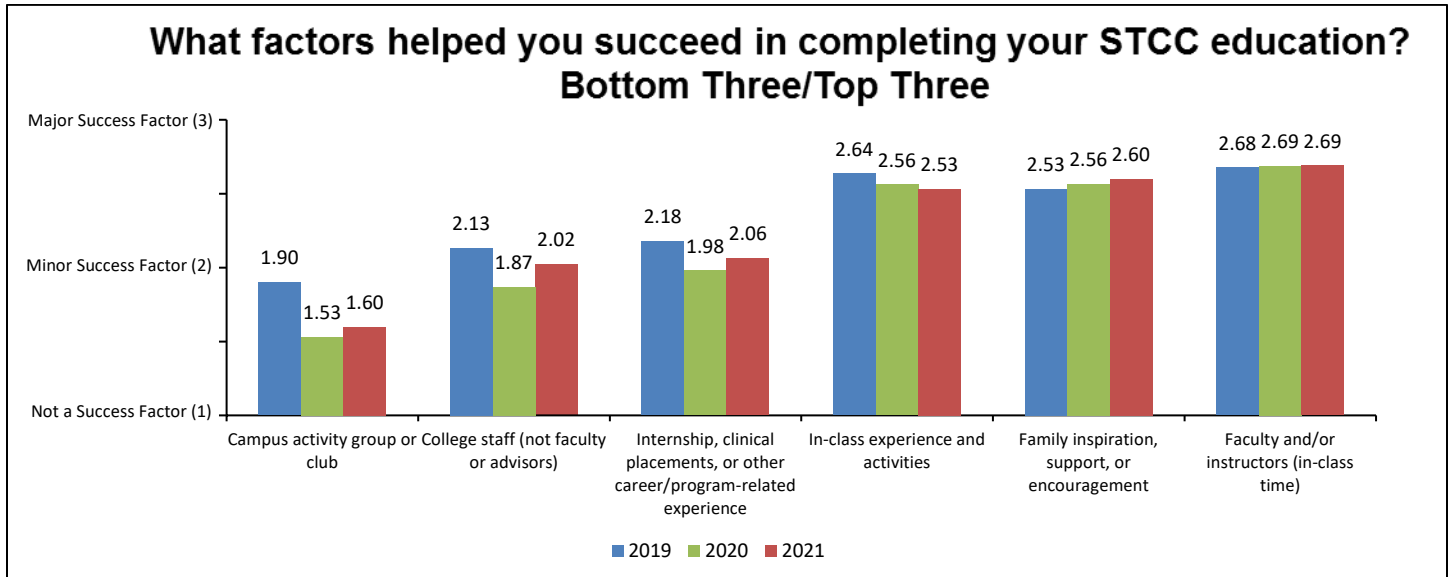

Family responsibilities and financial difficulties have consistently been the largest barriers to student success at Springfield Technical Community College for the last three years. In 2021, the mean for family responsibilities was 1.85 and the mean for financial difficulties was 1.64. In comparison, the barriers that have had the least impact on our students' success in 2021 were not enough access to advisors (1.25), not having a good place to study or complete my work (1.24), and not enough access to tutors or other academic support (1.24).

Faculty and/or instructors has been one of the top success factors for our students since the Graduating Student Survey was first administered in 2013. In 2021 the mean for in-class time with faculty and/or instructors was 2.69. In-class experience and activities (2.53) and family inspiration, support, or

encouragement (2.60) have also been consistently in the top three for the last three years. In comparison, the success factors that have had the least impact on our students' success in 2020 were internships, clinical placements, or other career/program-related experience (2.06), college staff who are not faculty or advisors (2.02) and campus activity groups or clubs (1.60).

Appendix I: Graduating Student Survey

Congratulations on your degree! We want to learn more from you to improve the college, programs, and courses so that even more students can be successful at STCC. Thank you in advance for sharing your thoughts and experiences!! As you graduate, you become a STCC alumni member. We hope you will become an active STCC alumni member and continue to provide feedback and guidance to the college. Happy graduation, Class of 2019!

Q1 What is the PRIMARY degree you are receiving? If you are receiving more than one degree or certificate, please answer based on the degree you consider to be your main area or focus.

- Associates Degree
- Certificate

Q2 About how long did it take you to finish this degree or certificate?

- Less than 1 year
- 1 year to less than 2 years
- 2 years to less than 3 years
- 3 years to less than 4 years
- 4 years to less than 5 years
- 5 years to less than 6 years
- 6 or more years
