

## **CNC mill training classes begin Jan. 7**

**SPRINGFIELD** – The Springfield Technical Community College in January will offer accelerated 5 axis CNC mill training.

The course, which runs Jan. 7, 8 and 9, consists of 24 classroom hours. Classes are 8:30 a.m. to 5 p.m., with a 30-minute break for lunch.

STCC's Workforce Development Center will offer the applied training course, which encompasses everything students need to know to make their first part on a five-axis computer numerical control (CNC) mill. The class is taught in a lab located in Springfield Technology Park across from the STCC campus.

Training highlights include hands-on machine setup (fixtures, tooling and more), an opportunity to cut example parts on a Haas VF2 with a trunnion table, vericut machine simulation with collision detection, and an overview of longhand CNC programming and computer-aided manufacturing (CAM) programming. A certificate of completion will be provided.

For more information, people may contact the Workforce Development Center at 413-755-4225 or by email at [workforcetraining@stcc.edu](mailto:workforcetraining@stcc.edu). People may visit [www.stcc.edu/wdc](http://www.stcc.edu/wdc) for more information.
