

COVID-19 Campus Repopulating Work Group
June 2, 2020

Present: Christopher Scott, Denise Hurst, Darcey Kemp, Joseph DaSilva, Jonathan Miller, Kathryn Senie, Kerri Kane, Deb Avery, Mike Cassesse and Theresa Przybylowicz.

Chris Scott reviewed the following documents with the work group –

- SHPS Pilot Campus Repopulation Program
- STCC Campus Safety Protocols
- SHPS Pilot Grid
- Public Safety Guidelines

Some of the highlights of the pilot program include the following –

- Each program will be assigned specific room and bathroom
- Access to campus is detailed in the plan
- Contact Tracing is discussed
- Decontamination protocols
- Student Affairs and Campus Police role in the pilot program

The pilot grid highlights the following programs – Respiratory Care, Sonography, Radiography and SIMS program. The grid indicates the date, time and location of both class location and restroom for the respective program. Students will be emailed by the Health Department the STCC Public Safety Guidelines for review and will have to attest to watching four videos before coming on campus. Once on campus, all students will have to wear a mask, have their temperature taken, practice social distancing, enter only through Bldg. 20, and sign in and out when arriving and leaving.

Jonathan Miller questioned whether we should be following these protocols for everyone coming on campus including staff and faculty. This may be an issue for some areas that start their day before the Health Department is on campus such as Campus Police and Facilities. It was determined that in those cases, a spreadsheet would be created and kept in the respective department with a touchless thermometer and employees will check each other upon arrival. Campus Police will do so at roll call. Jonathan also noted that it would be very difficult for his department to do screenings in Bldg. 20 and would prefer to do them in the Health Center. He will follow up with Chris Scott.

Darcy Kemp made note that if the pilot program is successful, a similar operation should be created for the students coming on campus in the fall.

Joseph DaSilva – what protocols will the College follow if someone tests positive for the virus? What will the steps that will need to be taken? Should be campus wide policies developed – not just for essential workers and Bldg. 20 personnel/students.

The working group was in agreement to recommend to Dr. Cook the pilot program. It was decided that the flow chart should be included in the plan. Kerri Kane and Denise Hurst will draft a recommendation letter.

Denise Hurst noted that a broader communication should be drafted for campus community. She also noted that Jim Mello and Keith Paul are available to assist with the writing portion of the plan and Kerry Ferraro is available to assist with graphics if needed.

Action Items

- Computers – come up with plan on how to disinfect
- Should all individuals coming on campus follow the testing protocol – temp, etc.
- Kerri will create spreadsheet for documenting date/time/temp, etc. for each individual coming on campus.
- Chris Scott will send the Updated Safety Protocols and Draft of Testing and exposure protocols worksheet to the group
- Denise and Kerri will draft a recommendation form for the pilot program to present to Dr. Cook
- Jonathan will contact Chris Scott about doing screenings in Health Services, not Bldg. 20.
- What protocols will College follow if someone tests positive? Jonathan Miller will work on draft.
- Kerri Kane will include a tab for cleaning supplies in the Oregon document
- Room inventory status should be complete by June 5

Date of upcoming meetings

June 5 – 12:00

June 9 – 11:30

June 12 – 12:00

June 16 – 11:00

June 19 – 12:00

June 23 – 11:00

June 26 – 1:00
