COVID-19 Campus Repopulating Work Group
Minutes
August 7, 2020

Present: Dr. Cook, Darcey Kemp, Kathryn Senie, David Buonora, Patrick Dawes, Jonathan Tudryn, Denise Hurst, Deb Avery, Chris Scott, Chief Rivera, Theresa Przybylowicz, Cliff Porter, Quiana Campbell, Keith Paul, Kerri Kane and Jonathan Miller

Update on Healthy Rosters
Cliff Porter reported on the two applications he reviewed thus far (Healthy Rosters and Full Measure). He advised that the group select Healthy Rosters as the application for STCC. He will view one more so that three vendors are compared. VP Kemp noted that although this application will work, a paper backup is needed for certain situations.

Review Workgroup Draft of COVID-19 Repopulation Plan
KC Senie presented the latest copy of the Repopulation Plan draft for review. The goal is to send the plan out campus wide by the end of the day. The following points were brought up and discussed during the review –

- Dr. Cook asked that the percentage of population number to be tested biweekly be removed.
- Can the Attestation/Access sheets be automated?
- WTCC will self-monitor.
- Will students heading to B20 have to also check in at the tent (yes)?
- No check in set up for Tech Park students (MET) – KC and Dr. Cook will speak offline.
- Who should faculty go to if a student is not complying with the PPE guidelines? What if staff/faculty member are not complying?
- Dr. Cook – note in plan that deep cleaning will be done monthly.
- Deb Avery – still no plan in place for computer cleaning – who will do it and what will be used?
- Need plan for higher risk individuals who have to come on campus – speak with ODS?
- Dr. Cook noted that the opening the gym for common area is problematic. Very important to determine how many students will actually take more than one class per day.
- Dr. Cook noted that contact tracing must be based upon a positive test result, not a suspicion.
- Jonathan Miller noted that the testing must be convenient or people will not do it.
NEXT STEPS

➢ Darcey will work on rosters

➢ Testing solution must be formalized

➢ Determine if books and materials can be delivered to students at home (VANPOOL)

➢ What are we doing when people come on campus making deliveries? Are we screening these individuals?
