

**COVID-19 Campus Repopulating Work Group
Minutes**

October 13, 2020

Present: Darcey Kemp, Kathryn Senie, Deb Avery, David Buonora, Patrick Dawes, Quiana Campbell, Barbara Washburn, Keith Paul, Cliff Porter, Chief Rivera, Theresa Przybylowicz, Mary Kaselouskas, Jenkin Gould, Chet DeGray and Jonathan Miller

Discussion Points

- Jenkin Gould presented an update on the check-in process. He is in the process of hiring three additional people who will start this week. The clearance of individuals who have travelled out of state was discussed. They will be denied access to campus for two weeks based upon the questions we ask. Does not take into account if a negative test result has been presented to either Health Services or HR. Jonathan Miller, Cliff Porter and KC Senie will meet offline to discuss possible wording change to the questions.
- KC Senie presented a chart summarizing the number of tests performed by AMR from September 14 to October 8. During this time, there were a total of 254 tests performed with one positive test result. Barbara Washburn asked who was doing contact tracing for the positive test results. KC noted that the City of Springfield Health Department handles this. STCC will determine where the student/staff/faculty member was on campus (building/classroom) and whether others in the area need to be notified of the positive test. Barbara requested an email from KC indicating what information the Dean's will be responsible for if a positive case comes up in their area.
- Wording for weather related closings must be firmed up soon. KC Senie is working on this and will get snow/weather policy out soon.
