COVID-19 Campus Repopulating Work Group
Minutes
July 20, 2021

Discussion Points

- Yaritza Robar informed the group that the Testing Center will be expanding their hours of operation to include evening hours (Tuesday and Thursday). They will also be opening on Fridays as well.

- The enrollment number update was as follows –
  - 365 class sections
  - 1382 students
  - 133 faculty

- The vending machines in Bldg. 17 are not being stocked because there is only one class being held in this building. Bldg. 2 and Bldg. 20 machines are fully stocked.

- Kerri Kane is working with Vonetta Lightfoot regarding a play that she would like to hold on campus. It would be part of the Diversity series. This would include rehearsals as well as shows. Are we equipped to handle this at this time?

- Kerri is also working with Lidya Rivera regarding the Extreme Kid’s Science Conference which will host approximately 75-100 people. The gym will host tables and exhibits and a key note speaker will be in the auditorium.

- Federal Street pedestrian gate is still closed. Per Deputy Chief DeGray - when the campus is fully opened the gates will be opened as well.

- The group would support generic signage around campus. Should be in place before return of the students in fall. Can we have a sign asking unvaccinated people to wear a mask?

- Lisa Fugiel noted that her students have been notified numerous times that a number of clinical facilities will require vaccination. Some students are waiting for vaccine to be fully approved.

- AMR testing will be back to three days per week beginning September 7, 2021 and will run through the end of December.

- Tom Therrien informed the group that cleaning between each class is not realistic with full class load. Wipes will be centrally located throughout campus.

- A list of all offices that are open and their hours would be very helpful.
