

How to connect using the VPN

The VPN (virtual private network) can be accessed from a STCC issued laptops. To locate the Cisco AnyConnect client from a Windows 10 laptops, select the up arrow on the bottom tray, then click on the VPN icon (white circle with blue/green ribbon).

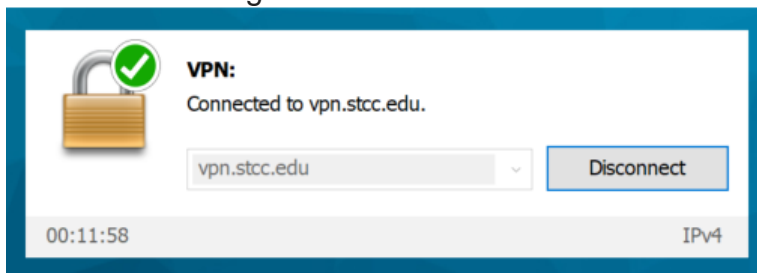

From the Windows 7 laptop select the Cisco AnyConnect Secure Mobility client (White circle with blue/green ribbon) from the bottom tray.

Select or type in vpn.stcc.edu in the connect field and press connect. Log in with your STCC username and password

When complete select the icon again and disconnect

Note: The VPN is for connection off campus and will not work on campus. This may be why you get this message. You may be able to connect using the STCC_Guest Wi-Fi.
