

## **SPRINGFIELD TECHNICAL COMMUNITY COLLEGE** **STUDENT RIGHT-TO-KNOW GRADUATION RATE**

*The federal government requires that all post-secondary institutions provide both prospective and current students with information concerning the performance of current students as an illustration of the likelihood of success. The law requires that the information include the rate at which degree-seeking students who attend the institution on a full-time basis and are attending any college for the first time successfully complete the program. A student is considered to have successfully completed the program if he/she graduates within 150% of the time required by the program. For example, a student who graduates from a two-year program within three years has successfully completed the program by federal guidelines.*

**The Springfield Technical Community College graduation rate for full-time, first-time, degree-seeking freshman entering the College in the fall of 2016 was 22%, with a four-year average of 22%. An additional 13% of these students transferred to other institutions prior to completing their STCC program, with a four-year average of 12%.**

It should be noted that the full-time, first-time, degree-seeking freshman population represents 39% of the fall 2016 incoming class. The performance of the remaining 61% of the incoming class, by law, is not included in the rate reported above.
